Summary

Full Stack and AI Developer focused on building web products, automations, and intelligent systems. Practical experience with TypeScript, Next.js/React, databases, cloud tools, AI APIs, and structured use of code agents in development workflows. Currently working at CaisHub and Solaria while pursuing a Bachelor's degree in Artificial Intelligence at UFDPAr.

Experience

2026 - Present AI Developer, Solaria

- Developing machine learning models to detect patterns in time-series data.

Dec. 2025 - Full Stack Developer, CaisHub, Parnaíba, PI

Present ○ Worked on n8n automations, webhook integrations, and web application development.

- Contributed as a full stack developer and system designer on Farol DAO, using Next.js, TypeScript, Docker, and AI services.

- Built AI agents and agentic workflows for Farol DAO, using code agents, MCPs, and prompt engineering throughout development.

Education

2026 - Present Bachelor's Degree in Artificial Intelligence, Federal University of Delta do Parnaíba - UFDPAr, Parnaíba, PI

- Program focused on data science, machine learning, automation, applied robotics, research, and innovation.

Jan. 2023 - Technical High School in Informatics, Federal Institute of Piauí - IFPI, Parnaíba, PI

Dec. 2025 ○ Foundation in web development, programming logic, Arduino, systems analysis and design, Node.js, and Git.

Selected Projects

2026 Farol DAO, AI-powered platform connecting entrepreneurs with the innovation ecosystem — faroldao.com.br

- Developed at CaisHub to connect entrepreneurs with institutions, hubs, accelerators, investors, and specialists.
- Worked as a full stack developer and system designer on architecture, product organization, and AI service integrations.
- Stack includes Next.js, TypeScript, Docker, automations, code agents, OpenRouter, Google AI Studio, DeepSeek, and ElevenLabs.

2026 Fiufeed, Open source social network for short audio posts — fiufeed.vercel.app — github.com/nicolaspier/fiufeed

- Audio posts, public/private groups, reposts, profiles, competitions, voting, and badges.
- Built with Next.js 16, React 19, TypeScript, Tailwind CSS 4, and Supabase with Auth, Postgres, Storage, and RLS.

- 2025 Robi Assistant, Local Portuguese voice assistant — github.com/nicolaspier/robi-assistant
- Python system with Whisper, Ollama, and Yapper-TTS/Piper.
 - Implements voice activity detection, silence control, and anti-feedback handling.
- 2024 PlantCollect, AI-powered plant identification — IFPI academic project
- Plant identification and care recommendations using AI API integration; built with React/React Native.
- 2024 GuaraniChat, Experimental chat with linguistic encoding — Ciência PHB, 4th place
- Built with React, Node.js, WebSocket, and translation integration; received an honorable mention.

Events and Recognition

Ciência PHB GuaraniChat placed 4th and received an honorable mention.

IFPI na Praça Presented PlantCollect and GuaraniChat to an external audience.

Innovation Fair Presented scientific projects focused on creativity, technology, and social impact.

Skills

Frontend TypeScript, JavaScript, React, Next.js, Tailwind CSS, HTML, CSS, responsive UI.

Backend and Node.js, Express, Python, PostgreSQL, MongoDB, Supabase, Prisma, REST APIs, data authentication, and RLS.

AI and Machine learning, time-series analysis, pattern detection, AI agents, agentic automation workflows, OpenAI API, Whisper, Ollama, OpenRouter, n8n, webhooks, MCPs, and prompt engineering.

DevOps and Git, GitHub, Docker, Vercel, Cloudflare Workers, Linux/VPS, Codex, Claude Code, tools testing, and technical documentation.

Languages Portuguese native, fluent English, basic French, and basic Spanish.
